**DETAILED ACTION**

***Election/Restrictions***

1. Claims 12-16 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9-278-06.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 17-19 are rejected under 35 U.S.C. 102(a) as being anticipated by Grenfell (US 2004/ 0194499).

Regarding claims 17-19 Grenfell teaches contacting the incompressible fill fluid with a getter to absorb hydrogen released into the incompressible fill fluid [0044][0045][0046][0051].

***Allowable Subject Matter***

4. Claims 1-11 is allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the cited art does not disclose nor suggest a getter disposed to contact fill fluid within the system. With respect to claim 17 the cited prior art does not disclose nor suggest contacting an incompressible fill fluid within a remote process seal assembly/ pressure transmitter with a getter to absorb hydrogen released into the incompressible fill fluid.

Claims 20-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 7036381, 6539808, 65107440, 6401546 disclose fluid assemblies that contain isolating and/or remote elements.
